

The Safe Mobility for Life Coalition is asking for your help as we work to improve the safety, access, and mobility of Florida's aging population. We are conducting an aging road user survey to better understand how Floridians (50 years and older) get from place to place and we will use this information to update our Aging Road User Strategic Safety Plan.

To reach our goals, we could use your help in two ways:

1. If you live in Florida and you are 50 or older, please take the survey in whichever format is best!

Electronic survey: <http://www.surveygizmo.com/s3/3331043/Florida-s-Aging-Road-User-Survey>

2. If you need a paper copy for the survey, please contact the Walton Okaloosa Council on Aging at 892-8165, they will be able to get one for you & you can return to them before the 10th of March.

We want to reach as many participants as possible over the next 3 weeks. The information received will be used to help us make sure we address the transportation safety and mobility needs and develop useful educational materials for aging road users throughout the state. Participation has no known risks and no direct benefits and the records of this survey will be kept private and confidential to the extent permitted by law. In any report we might publish, we will not include any information that will make it possible to identify a subject. Participation in this survey is completely voluntary and shouldn't take much time.

The survey will close on: **Friday, March 10, 2017**
