

Childrens

Books and Programs

We offer a variety of books, ranging from the latest titles, award-winners, and classics. Board books, junior DVDs and an extensive fiction and non-fiction selection offer something for every child. Below are diverse websites to supplemental educational children's resources. *Some sites may require purchase fees.*

Aquation: The Freshwater Access Game is produced by the Smithsonian. This simulation game educates children on water equity and challenges players to distribute resources and humanitarian aid around the globe. Available in English.

Explore the world as a magician wielding the power of arithmetic. **Arithmagic** uses the power of tap and drag & drop to allow you to fluidly cast math spells at enemies, flip the operators on the spells, and combine spells together!

This companion to the PBS KIDS series **The Cat in the Hat Builds That** explores a variety of engaging STEM mini-games and activities. Includes supplemental materials and suggestions for caregiver/child interaction. Available in English and Spanish.

The **GoNoodle - Kids Video** app and website is full of short videos that provide music, movement, dance, stretching, yoga and mindfulness. A simple way to get kids moving in a safe and fun environment. Available in English.

Children build and personalize their own robot as they travel through outer space with **Jet's Bot Builder** and his friends in this adaptive STEM app from PBS KIDS. Closed captions available. Available in English.

The Tag Reader systems are specifically designed for use in the library. Books range from phonics, geography, math and science. **Some books include favorites from Disney, Dr. Seuss, Nickelodeon, and more!** These are available upon request at the circulation desk.
