Can you pay your bill online?

Through paperless E-Billing* customers have the option to receive their cable and/or utility bill via e-mail rather than a mailed paper bill. Paperless E-Billing is beneficial for customers and for the environment. Your E-Billing enrollment reduces the number of paper bills and envelopes you receive in the mail. In addition, E-Billing offers a convenient online bill payment option for subscribing customers.

Email Password Requirments

How to change your email password in Webmail once you are logged in:

Click on Settings

Click on Security Options

There should be a section for Change Password

Here you will enter the current password in the field for 'Current Password'

You will enter the new password in the two places for New Password and for Confirm Password

Next you will click to Update Password

This will save your new password.

Please remember the new passwords will need to follow the password requirements.

Passwords Requirements:

Must be a minimum of eight (8) characters

Must contain alphanumeric characters with at least one number or special character

Must contain both upper and lower case alphabetic characters

Cannot contain the user's email address user name

Cannot be one of the top known compromised passwords. This is a dynamically updated list that may contain what seem to be some well-formatted passwords, but that are known to be commonly tried by bots to hack into accounts.

An example of a good password: Linc0lnC@r593%

The qualifications of a new, strong/secure password is a combination of letters, numbers, and special characters; with at least one upper case letter. The special characters that we utilize when resetting email passwords are the following symbols: @ % _ - and the period (.)
